

### ➡ SPOT TRACE

The compact Spot Trace uses the Globalstar satellite network to alert you of unauthorized movement — i.e., theft — of your boat or tow vehicle. The Trace measures just 2¾ inches tall and 2 inches wide, so you can stash it where would-be thieves won't notice it. When movement is detected, it automatically sends a text/email with its GPS coordinates to your cellphone, then tracks its position, sending updates to your smartphone or computer. Powered by four AAA batteries, it has a variety of simple mounting options. You can also receive daily alerts to let you know your pride and joy is secure. **\$99.95 plus \$99.99/year; findmespot.com**

### ⬆ MAJOR AIS

The compact Smartfind M5 AIS Class A transponder from McMurdo not only gives you the ability to assess the AIS status of vessels around you, but it also lets you create a "buddy list" so you can keep track of your fishing friends who also have AIS. It also broadcasts your position to enhance safety, particularly when fishing in conditions where visibility is limited such as at night, in fog or in areas with obstructed visibility. It features a 3.5-inch color LCD display, an embedded coastline map and a detailed AIS target list. It also incorporates an AIS MOB and AIS SART alarm to assist in man-overboard emergencies. **Price TBA; mcmurdomarine.com**

### ⬅ ROUGH AND READY

The Cobra MR HH450 DUAL compact floating handheld features Rewind-Say-Again function, as well as GMRS channel dual-band operation for high-power walkie-talkie use. With 6 watts on VHF and GMRS power select between low, medium and high, it's instantly adaptable for short- and long-range communication. A total of 1,815 privacy combinations are possible when the 15 GMRS channels are combined with the 121 privacy codes. Accessories included are AC/DC adapters, drop-in charger, Li-ion polymer battery, belt clip, a AA battery tray for standard alkaline batteries, and a three-year warranty. **\$129.95; cobra.com**
